

# STEM 2 WORK

## [Inventionland](#)

Inventionland stands as the world's innovation destination. Over 1,000 visitors tour the invention factory each month. Its services now include comprehensive educational materials, as well as innovation supplies and services for schools and corporate innovation labs.

Creationers at Inventionland work in 16 unique themed sets, such as shipwrecked pirate ship, faux cave, treehouse, pet shack, giant shoe, cupcake kitchen, giant robot and castle complete with turrets and drawbridge. The inspiring setting includes three running waterfalls, life-like trees and butterflies and grass-lined sidewalks. In the rear of Inventionland is a red carpet that leads to a state-of-the-art audio, video, and animation studio complete with sound room and one of the largest green screens in the tri-state area. Its manufacturing capabilities include metalworking, woodworking, molding, laser cutting, prototyping, circuit board construction and more, which all take place in its state-of-the-art production facility.

## [Uber](#)

Riding with Uber

Your ride, on demand

Whether you're headed to PIT, the North Side wearing your black and gold or Mount Washington for a night out, the Uber app connects you with a reliable ride — from low-cost to premium — in minutes. One tap and a car comes directly to you. Your driver knows exactly where to go. And payment is completely cashless.

## [Google](#)

Google's Steel City office is a growing tech hub where engineers and product managers specialize in computer systems, networking, machine learning, computer vision, and route planning. We've launched revolutionary products, including the Sky Map app, Google Shopping, and the technology behind Face Unlock. We've also helped build products used by millions of users, including AdSense and AdWords. Our Shopping Operations team sits here, powering the complex ecosystem that allows you to search over 300 million products online. Set in a former Nabisco factory in Larimer, just minutes from Pitt and Carnegie Mellon, our workspace riffs on local fun thanks to a Kennywood Amusement Park-themed floor, office-wide trivia contests, and spontaneous jam sessions.

## [Simcoach Games](#)

Simcoach Games is the leader in delivering video games that drive sustainable learning and behavior change. Simcoach Games designs and develops video games that enable learners to achieve sustainable behavior change. We make learning simple, interactive and measurable.
